[]

How To Blitz! Sight Reading For Beginners is a prequel to Book 1. It is written for musicians who are just starting out in their piano careers and is designed to create a love of sight reading, through the fabulous []key sticker[] reward system.

The book presents three sight-reading concepts and a test in each of the ten levels, drilling rhythm reading and note and pattern recognition. By the end of Beginner Level 10, students will have a strong foundation of sight reading skills and will be ready to blitz their way through Books 1, 2 and 3!
