Right at Sight will help to develop and improve the very important skill of sight-reading at the piano, providing a structured approach and opportunities for regular practice. Hints are provided for the earlier pieces of each book to focus attention on notation, form, interpretation and technique. Suggestions to sight-sing phrases are included to promote aural awareness while playing. The entire course spans the elementary (Grade One) to the advanced (Grade Eight) level. Becoming a good sight-reader demands daily practice. Regular "exercise" with Right at Sight will prepare students to tackle whatever music they may want to play.
